41. Trump Disqualified

Given what we know about his efforts to overturn the 2020 election, should Donald Trump be allowed to serve as president again in the future?

43. Trump Pressured Raffensperger (More Wording)

In a January 2021 phone call, President Trump told Georgia Secretary of State Brad Raffensperger, a fellow Republican, that "I just want to find 11,780 votes, which is one more than we have," adding that "there's nothing wrong with saying... that you've recalculated." Do you believe that Trump pressured Raffensperger to overturn the state's presidential election result?

Asked of half of respondents

59B. Agreement with Statements About Ukraine — It’s not a war about Ukraine; this is about a war on freedom. Because if Russia takes Ukraine, they said Poland and the Baltics are next, and we’re looking at a world war. And if Russia wins, you can bet China’s gonna take Taiwan, Iran’s gonna get the bomb.

Do you mostly agree or mostly disagree with each of the following statements?

	Gender			Age				Race		
	Total	Male	Female	18-29	30-44	45-64	65+	White	Black	Hispanic

63. Social Media Companies Responsible for Promoting Content

A current Supreme Court lawsuit argues that while tech companies may not be liable for the content that users post, they should be legally responsible for harmful or dangerous content when their platform promotes or suggests it, pointing to the example of YouTube's algorithm recommending Islamic State-related content to users who eventually commit acts of terrorism. Would you favor or oppose holding tech companies liable for the user-generated content they promote?

Yahoo! News Poll

Sample 1,516 U.S. Adults
Conducted February 23 – 27, 2023
Margin of Error $\pm 2.7\%$

Polling Methodology and Margin of Error Calculation

The Yahoo! News survey was conducted by YouGov using a nationally representative sample of 1,516 U.S. adults interviewed online between February 23 – 27, 2023.

The sample was weighted according to gender, age, race, education, 2020 election turnout and Presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Baseline party identification is the respondent's most recent answer given prior to March 15, 2022, and is weighted to the estimated distribution at that time (32% Democratic, 27% Republican). Respondents were selected from YouGov's opt-in panel to be representative of all U.S. adults. The weights range from 0.1 to 5.5, with a mean of 1 and a standard deviation of 0.4.

The *margin of error* (a 95% confidence interval) for a sample percentage p based upon the entire sample is approximately 2.7%. It is calculated using the formula

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
