76. Respondent age by category

Under 30	21%
30-44	25%
45-64	33%
65+	21%

77. What racial or ethnic group best describes you?

White	63%
Black	12%
Hispanic	16%
Other	9%

78. What is the highest level of education you have completed?

HS or Less	38%
Some college	28%
College Grad/Postgrad	34%

79. Who did you vote for in the election for President in 2020?

Joe Biden	32%
Donald Trump	29%
Jo Jorgensen	1%
Howie Hawkins	0%
Other	1%
Did not vote for President	38%

80. Generally speaking, do you think of yourself as a ...?

Democrat	33%
Republican	28%
Independent	28%
Other	3%
Not sure	8%

81. In general, how would you describe your own political viewpoint?

Very liberal	10%
Liberal	17%
Moderate	31%
Conservative	19%
Very conservative	13%
Not sure	11%

Yahoo! News Poll

Sample 1,665 U.S. Adults
Conducted August 17 – 21, 2023
Margin of Error $\pm 2.8\%$

Polling Methodology and Margin of Error Calculation

The Yahoo! News survey was conducted by YouGov using a nationally representative sample of 1,665 U.S. adults interviewed online between August 17 – 21, 2023.

The sample was weighted according to gender, age, race, education, 2020 election turnout and Presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Baseline party identification is the respondent's most recent answer given prior to November 1, 2022, and is weighted to the estimated distribution at that time (33% Democratic, 27% Republican). Respondents were selected from YouGov's opt-in panel to be representative of all U.S. adults. The weights range from 0.1 to 6.0, with a mean of 1 and a standard deviation of 0.6.

The *margin of error* (a 95% confidence interval) for a sample percentage p based upon the entire sample is approximately 2.8%. It is calculated using the formula

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.

49. Approve of Elevating David Weiss to Special Counsel

Last week U.S. Attorney General Merrick Garland elevated David Weiss — the Trump-appointed prosecutor who has spent years investigating Hunter Biden — to the status of special counsel, giving Weiss additional leeway to probe Hunter Biden’s foreign business dealings, drug use and taxes. Do you approve or disapprove of this decision?

Yahoo! News Poll

Sample 1,665 U.S. Adults
Conducted August 17 – 21, 2023
Margin of Error $\pm 2.8\%$

Polling Methodology and Margin of Error Calculation

The Yahoo! News survey was conducted by YouGov using a nationally representative sample of 1,665 U.S. adults interviewed online between August 17 – 21, 2023.

The sample was weighted according to gender, age, race, education, 2020 election turnout and Presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Baseline party identification is the respondent's most recent answer given prior to November 1, 2022, and is weighted to the estimated distribution at that time (33% Democratic, 27% Republican). Respondents were selected from YouGov's opt-in panel to be representative of all U.S. adults. The weights range from 0.1 to 6.0, with a mean of 1 and a standard deviation of 0.6.

The *margin of error* (a 95% confidence interval) for a sample percentage p based upon the entire sample is approximately 2.8%. It is calculated using the formula

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
