**11. Approve of Federal Budget - Details Provided**

Congress just passed a federal budget known as the One Big Beautiful Bill Act that extends and expands the 2017 tax cuts for Americans of all incomes, at a cost of more than \$4 trillion, while partially paying for those cuts by reducing Medicaid and food stamp benefits for lower-income Americans and ending some clean energy programs. The budget also increases military and border spending and raises the debt ceiling to more than \$40 trillion. Do you approve or disapprove of this budget?

Sample 1,597 U.S. Adults  
Conducted June 26-30, 2025  
Margin of Error  $\pm 3.2\%$

## Polling Methodology and Margin of Error Calculation

The Yahoo! News survey was conducted by YouGov using a nationally representative sample of 1,729 U.S. adults interviewed online between July 24-28, 2025.

The sample was weighted according to gender, age, race, education, 2024 election turnout and Presidential vote, party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Party identification is weighted to the estimated distribution at the time of the election (31% Democratic, 33% Republican). Respondents were selected from YouGov's opt-in panel to be representative of all U.S. adults. The weights range from 0.1 to 6.5, with a mean of 1 and a standard deviation of 0.9.

The *margin of error* (a 95% confidence interval) for a sample percentage  $p$  based upon the entire sample is approximately 3.1%. It is calculated using the formula

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and  $n$  is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
