

1. Do you think that the effects of artificial intelligence (AI) on society will be...?

Very positive	9%
Somewhat positive	26%
Neither positive nor negative	13%
Somewhat negative	22%
Very negative	25%
Not sure	5%

2. How often do you use artificial intelligence (AI) tools?

Multiple times per day	11%
Daily	12%
Multiple times per week	15%
Weekly	7%
Multiple times per month	8%
Less frequently than monthly	17%
Never	25%
Not sure	4%

3. How likely do you think it is that some artificial intelligence (AI) systems will eventually develop consciousness?

They already have	11%
Definitely will happen	11%
Probably will happen	29%
Probably won't happen	14%
Definitely won't happen	10%
Not sure	24%

4. Do you think AI is currently able to think better or worse than the average...?

	Better	About the same	Worse	Don't know
Dog	59%	11%	13%	17%
Toddler	58%	14%	13%	15%
Elementary school student	55%	17%	14%	14%

Neil deGrasse Tyson	23%	15%	27%	35%
Noam Chomsky	23%	14%	18%	45%

6. Do you think AI is currently able to do the following better or worse than humans?

	Better	About the same	Worse	Don't know
Answer questions that require factual knowledge	44%	25%	18%	13%
Answer questions that require complex reasoning	33%	24%	28%	15%
Answer questions that require creativity	25%	24%	37%	14%

YouGov Survey: AI Reasoning Ability

July 16 - 20, 2026 - 1,110 U.S. adult citizens

Interviewing Dates	July 16 - 20, 2026
Target population	U.S. citizens, aged 18 and over
Sampling method	Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens.
Weighting	The sample was weighted according to gender, age, race, education, U.S. region, 2024 presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 33% Republican). The weights range from 0.051 to 6.023, with a mean of one and a standard deviation of 0.943.
Number of respondents	1,110
Margin of error	± 4 points (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	60 questions not reported.

Interviewing Dates	July 16 - 20, 2026
Target population	U.S. citizens, aged 18 and over
Sampling method	Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens.
Weighting	The sample was weighted according to gender, age, race, education, U.S. region, 2024 presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 33% Republican). The weights range from 0.051 to 6.023, with a mean of one and a standard deviation of 0.943.
Number of respondents	1,110
Margin of error	± 4 points (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	60 questions not reported.
