Monitor your child's phone and messages and alert you to problems	12%	34%	16%	32%	6%

6. Would you be willing to let AI do each of the following where you work?

Among employed people

	Definitely would	Probably would	Probably would not	Definitely would not	Not sure
Decide whether you or a coworker is laid off	5%	8%	22%	61%	5%
Decide whether you get a raise or a promotion	5%	19%	19%	49%	8%
Monitor your productivity and report to your manager	9%	24%	18%	43%	6%
Evaluate your job performance	9%	24%	20%	42%	6%
Assign your daily tasks and set your schedule	10%	35%	19%	31%	5%

7. How well do you think AI could do each of the following, compared with a person?

Among employed people

	Definitely could do it as well	Probably could do it as well	Probably could not do it as well	Definitely could not do it as well	Not sure
Your own job	8%	15%	21%	49%	7%
Most other people's jobs	9%	20%	33%	23%	16%

8. Have you ever done the following?

	Yes	No, but I would consider it	No, and I would not consider it	Prefer not to say
Use an AI chatbot for romantic or sexual companionship	5%	8%	84%	3%
Use an AI chatbot to talk with a virtual version of someone who has died	5%	14%	78%	2%
Have an ongoing personal friendship with an AI chatbot	10%	13%	75%	2%
Confide in an AI chatbot about a problem or secret you had not told anyone else	13%	16%	68%	3%

9. Have you ever done any of the following?

	Yes	No	Prefer not to say
Hidden how much you use AI from a partner or family member	9%	87%	4%
Submitted work that AI produced as your own	11%	83%	6%

YouGov Survey: Artificial Intelligence

June 26 - 29, 2026 - 1,126 U.S. adult citizens

Interviewing Dates	June 26 - 29, 2026
Target population	U.S. citizens, aged 18 and over
Sampling method	Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens.
Weighting	The sample was weighted according to gender, age, race, education, U.S. region, 2024 presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 33% Republican). The weights range from 0.051 to 6.517, with a mean of one and a standard deviation of 0.828.
Number of respondents	1,126
Margin of error	± 3.8 points (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	64 questions not reported.

YouGov Survey: Artificial Intelligence

June 26 - 29, 2026 - 1,126 U.S. adult citizens

Interviewing Dates	June 26 - 29, 2026
Target population	U.S. citizens, aged 18 and over
Sampling method	Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens.
Weighting	The sample was weighted according to gender, age, race, education, U.S. region, 2024 presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 33% Republican). The weights range from 0.051 to 6.517, with a mean of one and a standard deviation of 0.828.
Number of respondents	1,126
Margin of error	± 3.8 points (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	64 questions not reported.
