The Government's Commission for Counter Extremism has identified and evidenced a new category of extremist activity in our country, described as behaviours:

- That can incite and amplify hate, or engage in persistent hatred, or equivocate about and make the moral case for violence
- That draw on hateful, hostile or supremacist beliefs directed at an out-group who are perceived as a threat to the wellbeing, survival or success of an in-group
- That cause, or are likely to cause, harm to individuals, communities or wider society

Over the last four years, on average do you think that the level of extremist behaviour described above has increased, decreased, or stayed the same?
