	ome people around the world have talked about
ŝ	troducing a system of "vaccination passports" for their
	puntry. This would involve issuing a vaccine passport to
•	eople once they have received their full dose of the
c	OVID vaccine, and making it compulsory for them to
•	how this passport in order to do certain activities. To what stert, if at all, would you support or oppose making it
	ampulsory in Smarket for people to show a vaccination
	assport in order to do each of the following?
