In the budget George Osborne announced the introduction of a National Living Wage and increased the personal tax allowance, but also reduced the amount payable in tax credits to people in low paid jobs.

Which of the following best reflects your view of how government should help make people in low paid work better off?

It is better for government to use the law to force companies to pay low paid workers a better wage, even if this leads to higher unemployment	39	49	34	40	40	45	33	35	35	36	47	44	32	45	40	39	37	27	40

We'd like you to think about the level that benefits are set at, and the number of people who are eligible to claim benefits in Britain today. We'd like you to think about all benefits, including jobseekers allowance, housing benefit, disability benefits and tax credits for people in low paid work.

Do you think the amount of money that is available in benefits is too high, too low or about right?

Too high - the amount of money people can claim in benefits is too much, it's too expensive and unfair on taxpayers

Too low - the amount of money people can claim in benefits is too low, and leaves people with a genuine need in poverty

The balance is about right

Do you think the number of people who are eligible to claim benefits is too wide, too narrow or about right?

Too wide - many people are able to claim benefits who don't really need them

Too narrow - there are many people who genuinely need help, but aren't able to claim benefits

The balance is about right
