How much of a role, if any, do you think nuclear energy should play in attempts to make Britain's electricity generation low/no carbon?																									
A major role - it should be on a par with renewable energy sources like solar or wind	31	37	47	36	30	48	21	33	45	53	21	35	33	36	43	40	36	36	37	37	37	36	39	36	36
A minor role - while the country should utilise nuclear energy, it shouldn't be as big a part of the mix as renewable energy sources like solar or wind	35	31	23	39	46	16	53	39	23	29	32	43	29	30	30	35	29	25	31	29	27	28	32	35	32
No role - Britain should not generate any nuclear energy	12	12	8	13	13	8	15	16	9	7	17	7	13	17	8	11	14	12	11	19	18	10	9	11	12

Thinking about what Britain would need to do to meet its energy needs without using fossil fuels like oil, gas and coal, which of the following comes close to your view?

Britain would be able to sustain its needs using just renewable energy sources like solar or wind and would not need to use nuclear	25	23	13	26	25	16	42	26	18	17	29	24	28	22	17	23	22	24	23	25	29	23	22	22	23
To sustain its needs Britain would need to use nuclear energy alongside renewable energy sources like solar or wind	54	57	71	59	58	69	43	59	65	72	43	58	48	62	69	64	57	53	58	60	55	56	59	58	58
