## YouGc

## BACKGROUND

This spreadsheet contains survey data collected and analysed by YouGov plc. No information contained within this spreadsheet may be published without the consent of YouGov Plc and the client named on the front cover
Methodology: This survey has been conducted using an online interview administered to members of the YouGov Plc panel of 1.2 million individuals who have agreed to take part in surveys. Emails are sent to panellists selected at random from the base sample. The e-mail invites them to take part in a surve and provides a generic survey link. Once a panel member clicks on the link they are sent to the survey that they are most required for, according to the sample definition and quotas. (The sample definition could be "US adult population" or a subset such as "US adult females"). Invitations to surveys dont expire and respondents can be sent to any available survey. The responding sample is weighted to the profile of the sample definition to provide a
YouGov plc make every effort to provide representative information. All results are based on a sample and are therefore subject to statistical errors normally YouGov plc make every effort to provide re
associated with sample-based information.

For further information about the results in this spreadsheet, please contact YouGov Plc +1 888.729.0773 or email omnibus.us@yougov.com quoting the survey details

EDITOR'S NOTES - all press releases should contain the following information
All figures, unless otherwise stated, are from YouGov Plc. Total sample size was 2082 adults. Fieldwork was undertaken between 4th - 6 th September 2019. The survey was carried out online. The figures have been weighted and are representative of all US adults who are not retired (aged $18+$ ).

NOTE- All press releases or other publications must be checked by YouGov Plc before use. YouGov requires 48hours to check a press release unles otherwise agreed.

- YouGov is registered with the Information Commissioner

Any percentages calculated on bases fewer than 50 respondents must not be reported as they do not represent a wide enough cross-section of the target population to be considered statistically reliable. These figures will be italicised
