More specifically, in England university education is currently funded through a system of tuition fees of up to £9,535 a year. Students receive loans to cover the fees at the time, which they have to start paying back when they earn £25,000 a year. Any money still outstanding after forty years is written off.Do you think this is a fair or unfair way of funding university education?

Look at the following list of health services, some of which are currently charged for, some of which are currently free for some or all users. In each case, please say whether you think this should be free for all users, whether it should be free for some users (such as the least well off or those with specific health needs) but charged for others, or whether all people should be charged for that service.
