

R Programmer

Department: IT Development
Location: Redwood City, Portland or London
Hours: Full time

YouGov is seeking a technically sophisticated person for its Innovations group, based in Redwood City. We are looking for an expert data wrangler with experience working with big data in R -- cleaning, programming, and analysing. Work in a fast-paced and intellectually stimulating environment where innovative solutions to marketing, financial, and political problems are developed.

Key responsibilities

- Include implementation and design of software for data processing systems and data pipelines, and contributing to the existing R and Python codebase.

Required Qualifications

- Experience in advanced R programming and development.
- Development and system tools (version control systems, regular expressions, unix shell tools).
- Commitment and attention to detail and accuracy.
- Knowledge of applied data analysis or statistical modeling, and programming experience in Python or SQL a plus.

To apply, please email jobs.us@yougov.com

This is not an exhaustive list, and you will be expected to be flexible in your approach to carrying out your duties, that may change from time to time to reflect changes in the Company's circumstances. This will include providing cover for colleagues as required. The Company therefore reserves the right to vary the job description in consultation with you.
