Some people have suggested that Britain leaving the European Union without agreeing a deal could cause severe short term disruption, such as shortages of food and medicines. Which of the following best reflects your view?

YouGov Weighting Data

YouGov weights GB political surveys by (1) age interlocked with gender and education, (2) political attention (3) social grade (4) 2017 recalled vote interlocked with region and (5) EU referendum recalled vote. Weighting targets are YouGov estimates, data sources used in the calculation of targets are cited below. General election voting intention figures are additionally weighted by likelihood to vote. The poll was carried out online.

All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that they lie within 2 points.

Since our last poll we have updated our target weights for EU referendum recalled vote to account for the impact of deaths in the electorate since 2016.
