

1. How much of your work involves computers?

Asked of employed people

A lot	57%
A little	29%
None at all	14%

2. Overall, do you think that the effects of technology on society have been...?

Very positive	19%
Somewhat positive	40%
Neither positive nor negative	17%
Somewhat negative	15%
Very negative	7%
Not sure	2%

3. How often do you use artificial intelligence (AI) tools?

Multiple times per day	10%
Daily	10%
Multiple times per week	13%
Weekly	8%
Multiple times per month	10%
Less frequently than monthly	18%
Never	27%
Not sure	6%

4. Do you think that the effects of artificial intelligence (AI) on society will be...?

Very positive	9%
Somewhat positive	23%
Neither positive nor negative	18%
Somewhat negative	23%
Very negative	22%
Not sure	6%

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5. How much do you agree or disagree with the following statement?

From comments posted to Palantir's X feed at <https://x.com/PalantirTech/status/2045574398573453312>

	Agree	Disagree	Strongly agree	Some-what agree	Some-what disagree	Strongly disagree	Not sure
Silicon Valley owes a moral debt to the country that made its rise possible. The engineering elite of Silicon Valley has an affirmative obligation to participate in the defense of the nation.	52%	20%	21%	31%	12%	7%	29%
We must rebel against the tyranny of the apps. Is the smartphone our greatest creative if not crowning achievement as a civilization? The object has changed our lives, but it may also now be limiting and constraining our sense of the possible.	53%	21%	19%	35%	16%	6%	25%
Free email is not enough. The decadence of a culture or civilization, and indeed its ruling class, will be forgiven only if that culture is capable of delivering economic growth and security for the public.	55%	14%	20%	34%	8%	6%	32%
The limits of soft power, of soaring rhetoric alone, have been exposed. The ability of free and democratic societies to prevail requires something more than moral appeal. It requires hard power, and hard power in this century will be built on software.	35%	26%	10%	25%	17%	10%	39%

The question is not whether AI weapons will be built; it is who will build them and for what purpose. Our adversaries will not pause to indulge in theatrical debates about the merits of developing technologies with critical military and national security applications. They will proceed.

60% **12%** 27% 32% 7% 5% 29%

National service should be a universal duty. We should, as a society, seriously consider moving away from an all-volunteer force and only fight the next war if everyone shares in the risk and the cost.

37% **38%** 14% 23% 14% 24% 25%

If a U.S. Marine asks for a better rifle, we should build it; and the same goes for software. We should as a country be capable of continuing a debate about the appropriateness of military action abroad while remaining unflinching in our commitment to those we have asked to step into harm's way.

62% **14%** 29% 32% 9% 5% 24%

Public servants need not be our priests. Any business that compensated its employees in the way that the federal government compensates public servants would struggle to survive.

42% **23%** 19% 22% 14% 9% 35%

We should applaud those who attempt to build where the market has failed to act. The culture almost snickers at Musk's interest in grand narrative, as if billionaires ought to simply stay in their lane of enriching themselves Any curiosity or genuine interest in the value of what he has created is essentially dismissed, or perhaps lurks from beneath a thinly veiled scorn.

44% **25%** 16% 28% 13% 12% 31%

Silicon Valley must play a role in addressing violent crime. Many politicians across the United States have essentially shrugged when it comes to violent crime, abandoning any serious efforts to address the problem or take on any risk with their constituencies or donors in coming up with solutions and experiments in what should be a desperate bid to save lives.

52% **19%** 21% 32% 10% 9% 29%

continued on the next page . . .

continued from previous page

The ruthless exposure of the private lives of public figures drives far too much talent away from government service. The public arena—and the shallow and petty assaults against those who dare to do something other than enrich themselves—has become so unforgiving that the republic is left with a significant roster of ineffectual, empty vessels whose ambition one would forgive if there were any genuine belief structure lurking within.

47% **20%** 16% 31% 12% 7% 33%

The caution in public life that we unwittingly encourage is corrosive. Those who say nothing wrong often say nothing much at all.

57% **15%** 19% 38% 10% 5% 28%

The pervasive intolerance of religious belief in certain circles must be resisted. The elite's intolerance of religious belief is perhaps one of the most telling signs that its political project constitutes a less open intellectual movement than many within it would claim.

47% **21%** 18% 29% 11% 11% 31%

Some cultures have produced vital advances; others remain dysfunctional and regressive. All cultures are now equal. Criticism and value judgments are forbidden. Yet this new dogma glosses over the fact that certain cultures and indeed subcultures . . . have produced wonders. Others have proven middling, and worse, regressive and harmful.

We must resist the shallow temptation of a vacant and hollow pluralism. We, in America and more broadly the West, have for the past half century resisted defining national cultures in the name of inclusivity. But inclusion into what?

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

Interviewing Dates	April 20 - 22, 2026
Target population	U.S. citizens, aged 18 and over
Sampling method	Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens.
Weighting	The sample was weighted according to gender, age, race, education, U.S. region, 2024 presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 33% Republican). The weights range from 0.052 to 6.101, with a mean of one and a standard deviation of 0.951.
Number of respondents	1,120
Margin of error	± 4 points (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	56 questions not reported.

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5B. Agreement With Statements on Technology and Society — We must rebel against the tyranny of the apps. Is the smartphone our greatest creative if not crowning achievement as a civilization? The object has changed our lives, but it may also now be limiting and constraining our sense of the possible.

How much do you agree or disagree with the following statement?

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5D. Agreement With Statements on Technology and Society — The limits of soft power, of soaring rhetoric alone, have been exposed. The ability of free and democratic societies to prevail requires something more than moral appeal. It requires hard power, and hard power in this century will be built on software.

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5E. Agreement With Statements on Technology and Society — The question is not whether AI weapons will be built; it is who will build them and for what purpose. Our adversaries will not pause to indulge in theatrical debates about the merits of developing technologies with critical military and national security applications. They will proceed.

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5I. Agreement With Statements on Technology and Society — We should show far more grace towards those who have subjected themselves to public life. The eradication of any space for forgiveness—a jettisoning of any tolerance for the complexities and contradictions of the human psyche—may leave us with a cast of characters at the helm we will grow to regret.

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5J. Agreement With Statements on Technology and Society — The psychologization of modern politics is leading us astray. Those who look to the political arena to nourish their soul and sense of self, who rely too heavily on their internal life finding expression in people they may never meet, will be left disappointed.

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5M. Agreement With Statements on Technology and Society — No other country in the history of the world has advanced progressive values more than this one. The United States is far from perfect. But it is easy to forget how much more opportunity exists in this country for those who are not hereditary elites than in any other nation on the planet.

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5N. Agreement With Statements on Technology and Society — American power has made possible an extraordinarily long peace. Too many have forgotten or perhaps take for granted that nearly a century of some version of peace has prevailed in the world without a great power military conflict. At least three generations — billions of people and their children and now grandchildren — have never known a world war.

50. Agreement With Statements on Technology and Society — The postwar neutering of Germany and Japan must be undone. The defanging of Germany was an overcorrection for which Europe is now paying a heavy price. A similar and highly theatrical commitment to Japanese pacifism will, if maintained, also threaten to shift the balance of power in Asia.

5P. Agreement With Statements on Technology and Society — We should applaud those who attempt to build where the market has failed to act. The culture almost snickers at Musk’s interest in grand narrative, as if billionaires ought to simply stay in their lane of enriching themselves . . . Any curiosity or genuine interest in the value of what he has created is essentially dismissed, or perhaps lurks from beneath a thinly veiled scorn.

5Q. Agreement With Statements on Technology and Society — Silicon Valley must play a role in addressing violent crime. Many politicians across the United States have essentially shrugged when it comes to violent crime, abandoning any serious efforts to address the problem or take on any risk with their constituencies or donors in coming up with solutions and experiments in what should be a desperate bid to save lives.

5R. Agreement With Statements on Technology and Society — The ruthless exposure of the private lives of public figures drives far too much talent away from government service. The public arena—and the shallow and petty assaults against those who dare to do something other than enrich themselves—has become so unforgiving that the republic is left with a significant roster of ineffectual, empty vessels whose ambition one would forgive if there were any genuine belief structure lurking within.

5T. Agreement With Statements on Technology and Society — The pervasive intolerance of religious belief in certain circles must be resisted. The elite’s intolerance of religious belief is perhaps one of the most telling signs that its political project constitutes a less open intellectual movement than many within it would claim.

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5U. Agreement With Statements on Technology and Society — Some cultures have produced vital advances; others remain dysfunctional and regressive. All cultures are now equal. Criticism and value judgments are forbidden. Yet this new dogma glosses over the fact that certain cultures and indeed subcultures . . . have produced wonders. Others have proven middling, and worse, regressive and harmful.

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

5V. Agreement With Statements on Technology and Society — We must resist the shallow temptation of a vacant and hollow pluralism. We, in America and more broadly the West, have for the past half century resisted defining national cultures in the name of inclusivity. But inclusion into what?

YouGov Survey: Technology and Society

April 20 - 22, 2026 - 1,120 U.S. adult citizens

Interviewing Dates	April 20 - 22, 2026
Target population	U.S. citizens, aged 18 and over
Sampling method	Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens.
Weighting	The sample was weighted according to gender, age, race, education, U.S. region, 2024 presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 33% Republican). The weights range from 0.052 to 6.101, with a mean of one and a standard deviation of 0.951.
Number of respondents	1,120
Margin of error	± 4 points (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	56 questions not reported.
