Foreword

It's not a platitude: **the data clearly shows that the FIFA World Cup 2026 is bigger than football itself.** This isn't just a tournament, it's a cultural event with a gravitational pull that touches sport, music, travel, and identity. And the buzz backs it up. Months before a ball is even kicked, consumer excitement in the three host countries has already surpassed levels seen at the same stage of the Qatar tournament four years ago.

The audience? Exactly who today's brands want to reach. Globally, FIFA World Cup fans skew younger and carry above-average spending power. And the highly desirable, younger fans are even more interesting – they're significantly more likely to not only notice sponsors, but to view a brand's FIFA World Cup sponsorship in a positive light.

For millions of North American fans, this will be the first time they see their favorite global football stars play live. The players they've

followed on social media, watched in highlight reels, debated with friends – suddenly right there, in their city (or the one they've eagerly traveled to). This kind of moment doesn't just drive engagement; it creates the kind of emotional intensity that brands dream about being part of.

And the smartest brands aren't waiting for kickoff. The impact of sponsorship is already visible as companies align not just with a four-week event, but with a movement – the rise of football culture across North America and the shifting way younger audiences connect with sport. Early movers are seeing real returns well ahead of the opening whistle.

The research that follows lays out the full picture. Whether you're a brand weighing your first move into football, or a rights holder looking to maximize what you've got, the takeaway is simple: this is the opportunity, and the window is now."

Key takeaways

01

More than 4 in 10 global adults will follow the FIFA World Cup 2026, reaching far beyond just football enthusiasts

- FIFA World Cup fans are younger, higher earners than the average adult, and more likely to be males
- Younger fans are the most receptive to FIFA World Cup 2026 sponsors, indicating higher likelihood to both recommend sponsor brands to others and purchase/try brands associated with the tournament

02

North American fans are abuzz about the tournament: a rare opportunity to see international football stars on their home turf

- While Mexicans exhibit the highest likelihood to engage across the three host countries, growth opportunities are strong in the U.S. and Canada, where fans are significantly younger, less price sensitive, and eager to maximize their on-site fun at matches
- Social experiences (and easy opportunities/moments to share them) are a priority for match attendees

03

Association with the FIFA World Cup positively impacts a brand's purchase likelihood, trust, and relevance

- In some global markets, upwards of 80% of FIFA World Cup 2026 likely followers indicate they view sponsors of the tournament more favorably
- In addition to feeling sponsor brands are more trustworthy and socially relevant, FIFA World Cup fans in the U.S. also appreciate and expect special discounts from sponsors
