

1. Do you personally know anyone who has taken semaglutide for weight-loss purposes? Select all that apply.

Yes, a family member	20%
Yes, a friend	17%
Yes, an acquaintance	12%
Yes, me	10%
None of the above	55%
Prefer not to say	2%

2. Semaglutide causes people to lose weight by suppressing their appetite and by slowing the rate at which food empties out of the stomach. Possible side effects include nausea, diarrhea, vomiting, and constipation. If semaglutide were available to you, how interested would you be in taking it to lose weight?

Very interested	11%
Somewhat interested	17%
Not very interested	17%
Not at all interested	48%
Not sure	6%

3. Has a doctor or other health care provider ever suggested that you consider a prescription weight-loss drug?

Yes	16%
No	81%
Not sure	3%

4. How safe or unsafe do you think the weight-loss drug semaglutide is?

Very safe	6%
Somewhat safe	26%
Somewhat unsafe	27%
Very unsafe	13%
Not sure	29%

5. How effective at helping people lose weight do you think the weight-loss drug semaglutide is?

Very effective	27%
Somewhat effective	37%
Not very effective	7%
Not at all effective	2%
Not sure	26%

6. Do you think that the development of weight-loss drugs such as semaglutide is overall a good or a bad thing for society?

Good thing	28%
Neither good nor bad	30%
Bad thing	22%
Not sure	20%

7. For people who are obese and are using drugs such as semaglutide to lose weight, do you think that...?

The benefits significantly outweigh the risks	16%
The benefits somewhat outweigh the risks	26%
The benefits and risks are balanced	17%
The risks somewhat outweigh the benefits	14%
The risks significantly outweigh the benefits	9%
Not sure	19%

8. Do you think that access to weight-loss drugs such as semaglutide should...?

Be much more regulated	20%
Be somewhat more regulated	26%
Have no change in regulation	22%
Be somewhat less regulated	7%
Be much less regulated	5%
Not sure	20%

9. Should prescription weight-loss drugs be covered by private insurance?

Yes	64%
No	14%
Not sure	23%

10. Should prescription weight-loss drugs be covered by Medicaid?

Yes	56%
No	18%
Not sure	25%

11. If you were taking a prescription weight-loss drug, how comfortable would you be telling other people about it?

Very comfortable	24%
Somewhat comfortable	32%
Somewhat uncomfortable	18%
Very uncomfortable	11%
Not sure	15%

12. How would you describe your current overall health?

Excellent	13%
Very good	26%
Good	34%
Fair	20%
Poor	5%
Prefer not to say	1%

13. How would you describe your current body weight?

Obese	9%
Overweight	33%
Healthy weight	48%
Underweight	4%
Not sure	4%
Prefer not to say	3%

Interviewing Dates	August 26 - 28, 2026
Target population	U.S. citizens, aged 18 and over
Sampling method	Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens.
Weighting	The sample was weighted according to gender, age, race, education, U.S. region, 2024 presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 33% Republican). The weights range from 0.052 to 6.622, with a mean of one and a standard deviation of 0.988.
Number of respondents	1,103
Margin of error	± 4.2 points (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	85 questions not reported.

YouGov Survey: Weight Loss Drugs

August 26 - 28, 2026 - 1,103 U.S. adult citizens

Interviewing Dates	August 26 - 28, 2026
Target population	U.S. citizens, aged 18 and over
Sampling method	Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens.
Weighting	The sample was weighted according to gender, age, race, education, U.S. region, 2024 presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 33% Republican). The weights range from 0.052 to 6.622, with a mean of one and a standard deviation of 0.988.
Number of respondents	1,103
Margin of error	± 4.2 points (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	86 questions not reported.
