The 2020 UEFA European Championship tournament was due to be hosted across multiple European countries, however it has been postponed due to the pandemic. It has now been suggested that instead of some matches being played behind closed doors across Europe, all the matches of the postponed tournament could be played in the UK in 2021, where at least some fans would be able to attend as restrictions are lifted this summer. Would you support or oppose the UK hosting all the matches for the UEFA European Championship 2021?
