	%	%	%	%	%	%	%	%	%	%	%	%	%	%

For the following question, please imagine that you were describing how likely something is to happen using the following word/ phrase... On a scale of 0 to 10, where 0 is 'Completely certain not to happen' and 10 is 'Completely certain to happen'...

In general, how likely would you think each of the following words/ phrases mean something is to happen? (Please select one option on each row)

[Asked to a random split of respondents; n=1573]

### If something had the following chance of happening, how likely or unlikely would you say the chance of that thing happening is?

[Asked to a random split of respondents; n=1622]

1% chance of happening (would happen 1 time in every 100)

Almost certain	2	3	2	2	1	2	4	2	3	1	2	2	4	1
