20. Impeach Judge Blocking Trump Deportations - No Mention of Roberts' Response (1)

Donald Trump called the judge who blocked the deportations a "lunatic" and demanded that he be "impeached" by Congress. In response, Supreme Court Chief Justice John Roberts issued a rare statement saying that "impeachment is not an appropriate response to disagreement" with a court's decision. Do you think the judge in this case should...?

Sample 1,677 U.S. Adults
Conducted March 20 - 24, 2025
Margin of Error $\pm 2.7\%$

Polling Methodology and Margin of Error Calculation

The Yahoo! News survey was conducted by YouGov using a nationally representative sample of 1,677 U.S. adults interviewed online between March 20 - 24, 2025.

The sample was weighted according to gender, age, race, education, 2024 election turnout and Presidential vote, party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Party identification is weighted to the estimated distribution at the time of the election (31% Democratic, 32% Republican). Respondents were selected from YouGov's opt-in panel to be representative of all U.S. adults. The weights range from 0.1 to 6.1, with a mean of 1 and a standard deviation of 0.5.

The *margin of error* (a 95% confidence interval) for a sample percentage p based upon the entire sample is approximately 2.6%. It is calculated using the formula

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
