7. Approve of Federal Budget - Details Provided

The U.S. House of Representatives just passed a federal budget that extends and expands the 2017 tax cuts for Americans of all incomes, at a cost of \$3.8 trillion, while partially paying for those cuts by reducing Medicaid and food stamp benefits for lower-income Americans and ending some clean energy programs. The House budget also increases military and border spending and raises the debt ceiling from \$36 trillion to \$40 trillion. Do you approve or disapprove of this budget?

18. Should We Accept Afrikaner Refugees

Afrikaners are the descendants of white Europeans who came to South Africa centuries ago and later created its system of apartheid. Today, South Africa is more than 80% Black and some Afrikaners say they are being denied jobs and targeted with violence because they are white. Do you think the U.S. should accept Afrikaners as refugees?

22. Should We Accept Afrikaners Before Other Refugees

On May 12, the Trump Administration welcomed 59 Afrikaners into the U.S. as refugees while the rest of the U.S. refugee program remained on hold. Typically, refugee resettlement takes years; for the Afrikaners, it took three months. Do you think the U.S. should accept Afrikaners as refugees before resuming acceptance of refugees from other countries?

Sample 1,560 U.S. Adults
Conducted May 22 - 27, 2025
Margin of Error $\pm 3.2\%$

Polling Methodology and Margin of Error Calculation

The Yahoo! News survey was conducted by YouGov using a nationally representative sample of 1,560 U.S. adults interviewed online between May 22 - 27, 2025.

The sample was weighted according to gender, age, race, education, 2024 election turnout and Presidential vote, party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Party identification is weighted to the estimated distribution at the time of the election (31% Democratic, 32% Republican). Respondents were selected from YouGov's opt-in panel to be representative of all U.S. adults. The weights range from 0.1 to 6.5, with a mean of 1 and a standard deviation of 0.8.

The *margin of error* (a 95% confidence interval) for a sample percentage p based upon the entire sample is approximately 3.2%. It is calculated using the formula

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
