6. How likely do you believe it is that the cure for cancer will be discovered within your lifetime?

Very likely	
Somewhat likely	
Not very likely	
Not likely at all	
Not sure	

7. Do you think that in recent years, progress in research to treat or cure cancer has...?

Sped up	
Stayed at the same rate	
Slowed down	
Not sure	16%

8. Do you think that federal government spending on cancer research should...?

Increase	. 65%
Stay the same	. 17%
Decrease	3%
Not sure	. 15%

9. How much, if at all, did you donate in the last two years to any group concerned with curing cancer or supporting those who suffer from cancer?

None	
\$1 - \$49	
\$50 - \$99	,
\$100 - \$299	,
	,
	,
\$1000 - \$4,999	
\$5000 or more	,
Not sure	

Interviewing Dates	January 4 - 7, 2024
Target population	U.S. citizens, aged 18 and over.
Sampling method	Respondents were selected from YouGov's opt-in Internet panel us- ing sample matching. A random sample (stratified by gender, age, race, education, geographic region, and voter registration) was se- lected from the 2019 American Community Survey.
Weighting	The sample was weighted according to gender, age, race, education, 2020 election turnout and Presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Baseline party identification is the respondent's most recent answer given prior to November 1, 2022, and is weighted to the estimated distribution at that time (33% Democratic, 31% Republican). The weights range from 0.084 to 6.551, with a mean of one and a standard deviation of 0.812.
Number of respondents	1000
Margin of error	\pm 4% (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	67 questions not reported.

1. American Lifespan in 25 Years

In 25 years, do you think the average lifespan for Americans will be...?

Interviewing Dates	January 4 - 7, 2024
Target population	U.S. citizens, aged 18 and over.
Sampling method	Respondents were selected from YouGov's opt-in Internet panel us- ing sample matching. A random sample (stratified by gender, age, race, education, geographic region, and voter registration) was se- lected from the 2019 American Community Survey.
Weighting	The sample was weighted according to gender, age, race, education, 2020 election turnout and Presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Baseline party identification is the respondent's most recent answer given prior to November 1, 2022, and is weighted to the estimated distribution at that time (33% Democratic, 31% Republican). The weights range from 0.084 to 6.551, with a mean of one and a standard deviation of 0.812.
Number of respondents	1000
Margin of error	\pm 4% (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	67 questions not reported.
