The Economist/YouGov Poll

September 4 - 8, 2026 - 1469 U.S. Registered Voters

Sponsorship	<i>The Economist</i>
Fieldwork	YouGov
Interviewing Dates	September 4 - 8, 2026
Target population	Registered voters for November 3, 2026, U.S. election
Sampling method	Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens, and screened for voter registration.
Sample composition	2,097 started the survey after screenouts. 192 were deleted due to breakoffs, 19 were removed for interview completion time under 5 minutes, 7 were removed for attention check failures, and 263 were removed for data quality control. 1,469 of the 1,616 respondents in the cleaned sample reported that they were currently registered to vote or planned to register before the election in November.
Weighting	The sample was weighted according to gender, age, race, education, U.S. region of residence, 2024 election turnout and presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Demographic weighting targets come from the 2019 American Community Survey. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 33% Republican). The weights range from 0.052 to 6.575, with a mean of one and a standard deviation of 0.745.
Number of respondents	1469
Margin of error	± 3.4% (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	7 questions not reported.
