

1. Global warming a serious problem

Thinking about the issue of global warming, also known as climate change, do you think this is a serious problem facing this country, or not a serious problem?

2. Should federal government limit

President Obama recently announced new limits on the release of greenhouse gases from existing power plants in an effort to reduce global warming. Do you think the federal government should or should not limit the release of greenhouse gases from existing power plants in an effort to reduce global warming?

3. Increased cost

What if that significantly lowered greenhouse gases but raised your monthly energy expenses by 20 dollars a month - in that case do you think the government should put the limits President Obama announced in place?
