| Interviewing Dates | March 4-7, 2022 |
| :--- | :--- |
| Target population | U.S. Citizens, aged 18 and over. |
| Sampling method | Respondents were selected from YouGov's opt-in Internet panel using <br> sample matching. A random sample (stratified by gender, age, race, <br> education, geographic region, and voter registration) was selected <br> from the 2018 American Community Study. Voter registration was <br> imputed from the November 2018 Current Population Survey Regis- <br> tration and Voting Supplement. |
| Weighting | The sample was weighted based on gender, age, race, education, <br> news interest, and 2020 Presidential vote (or non-vote). The weights <br> range from 0.293 to 4.659, with a mean of one and a standard devia- <br> tion of 0.428. |
| Number of respondents | 1000 |
| Margin of error | $\pm 3.4 \%$ (adjusted for weighting) |
| Survey mode | Web-based interviews |
| Questions not reported | 70 questions not reported. |
