

Daily Survey: Supreme Court Reform

Sample 1000 U.S. Adult Citizens
Conducted June 27 - 30, 2022
Margin of Error ±3.3%

1. The U.S. Supreme Court has nine members. Some people believe that Congress should expand the size of the Supreme Court, allowing the current president to appoint one or more new Justices. Do you think that the size of the Supreme Court should be increased?

Should be increased	32%
Should not be increased	46%
Not sure	23%

2. How many Justices should there be on the U.S. Supreme Court?

Coded from open ended question asked of those who say the size of the Supreme Court should be increased

9 justices	47%
10 justices	2%
11 justices	4%
12 justices	7%
13 justices	8%
14 justices	0%
15 justices	3%
16 justices or more	6%
Not sure	23%

3. U.S. Supreme Court Justices currently serve life terms. Some people think that, instead, Supreme Court Justices should have term limits. Do you think that there should be term limits for Supreme Court Justices?

There should be	58%
There should not be	23%
Not sure	19%

4. How many years should be the term limit of a Supreme Court Justice?

Coded from open ended question asked of those who say there should be term limits for Supreme Court justices

4 years or less	13%
5-9 years	15%
10-14 years	16%
15-19 years	5%
20-24 years	5%
25 years or greater	4%
No term limits	24%
Not sure	19%

Daily Survey: Supreme Court Reform

Interviewing Dates	June 27 - 30, 2022
Target population	U.S. Citizens, aged 18 and over.
Sampling method	Respondents were selected from YouGov's opt-in Internet panel using sample matching. A random sample (stratified by gender, age, race, education, geographic region, and voter registration) was selected from the 2018 American Community Study. Voter registration was imputed from the November 2018 Current Population Survey Registration and Voting Supplement.
Weighting	The sample was weighted based on gender, age, race, education, news interest, and 2020 Presidential vote (or non-vote). The weights range from 0.28 to 4.434, with a mean of one and a standard deviation of 0.397.
Number of respondents	1000
Margin of error	± 3.3% (adjusted for weighting)
Survey mode	Web-based interviews
Questions not reported	561 questions not reported.
